

WHOIS Data Access Policy

Access to WHOIS information is available to assist in determining the contents of a domain name registration record in the registry database for top-level domain registries operated by Frontier Communications Corp. (“Frontier”) or our affiliated companies or designees. By submitting a WHOIS query, you agree to be bound by this policy. The data in the WHOIS database is provided by Frontier for informational purposes only, and we cannot guarantee the accuracy of data submitted by registrants. WHOIS data inaccuracy complaints may be submitted to ICANN at the following location and/or such other location as may be designated by ICANN: <https://forms.icann.org/en/resources/compliance/complaints/whois/inaccuracy-form>.

This service is intended only for query-based WHOIS information access. We may, from time to time, impose certain limits on the amount of simultaneous and/or consecutive WHOIS requests. You agree that you will use this data only for lawful purposes and that, under no circumstances will you use this data to: (a) allow, enable, or otherwise support the transmission by e-mail, telephone, facsimile, or mail of mass unsolicited, commercial advertising or solicitations; or (b) enable high volume, automated, electronic processes that send queries or data to the systems of Frontier or an approved registrar except as reasonably necessary to register domain names or modify existing registrations. Frontier reserves the right to modify this policy at any time.
